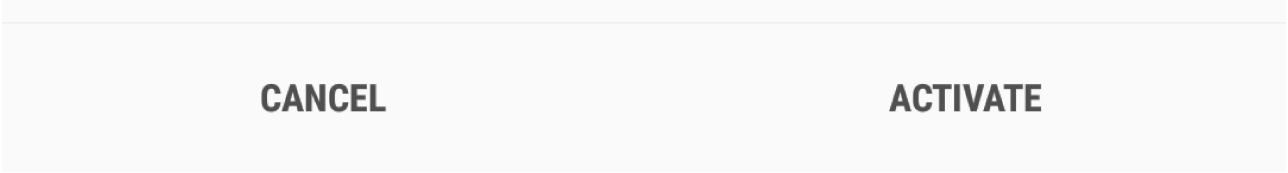
Email

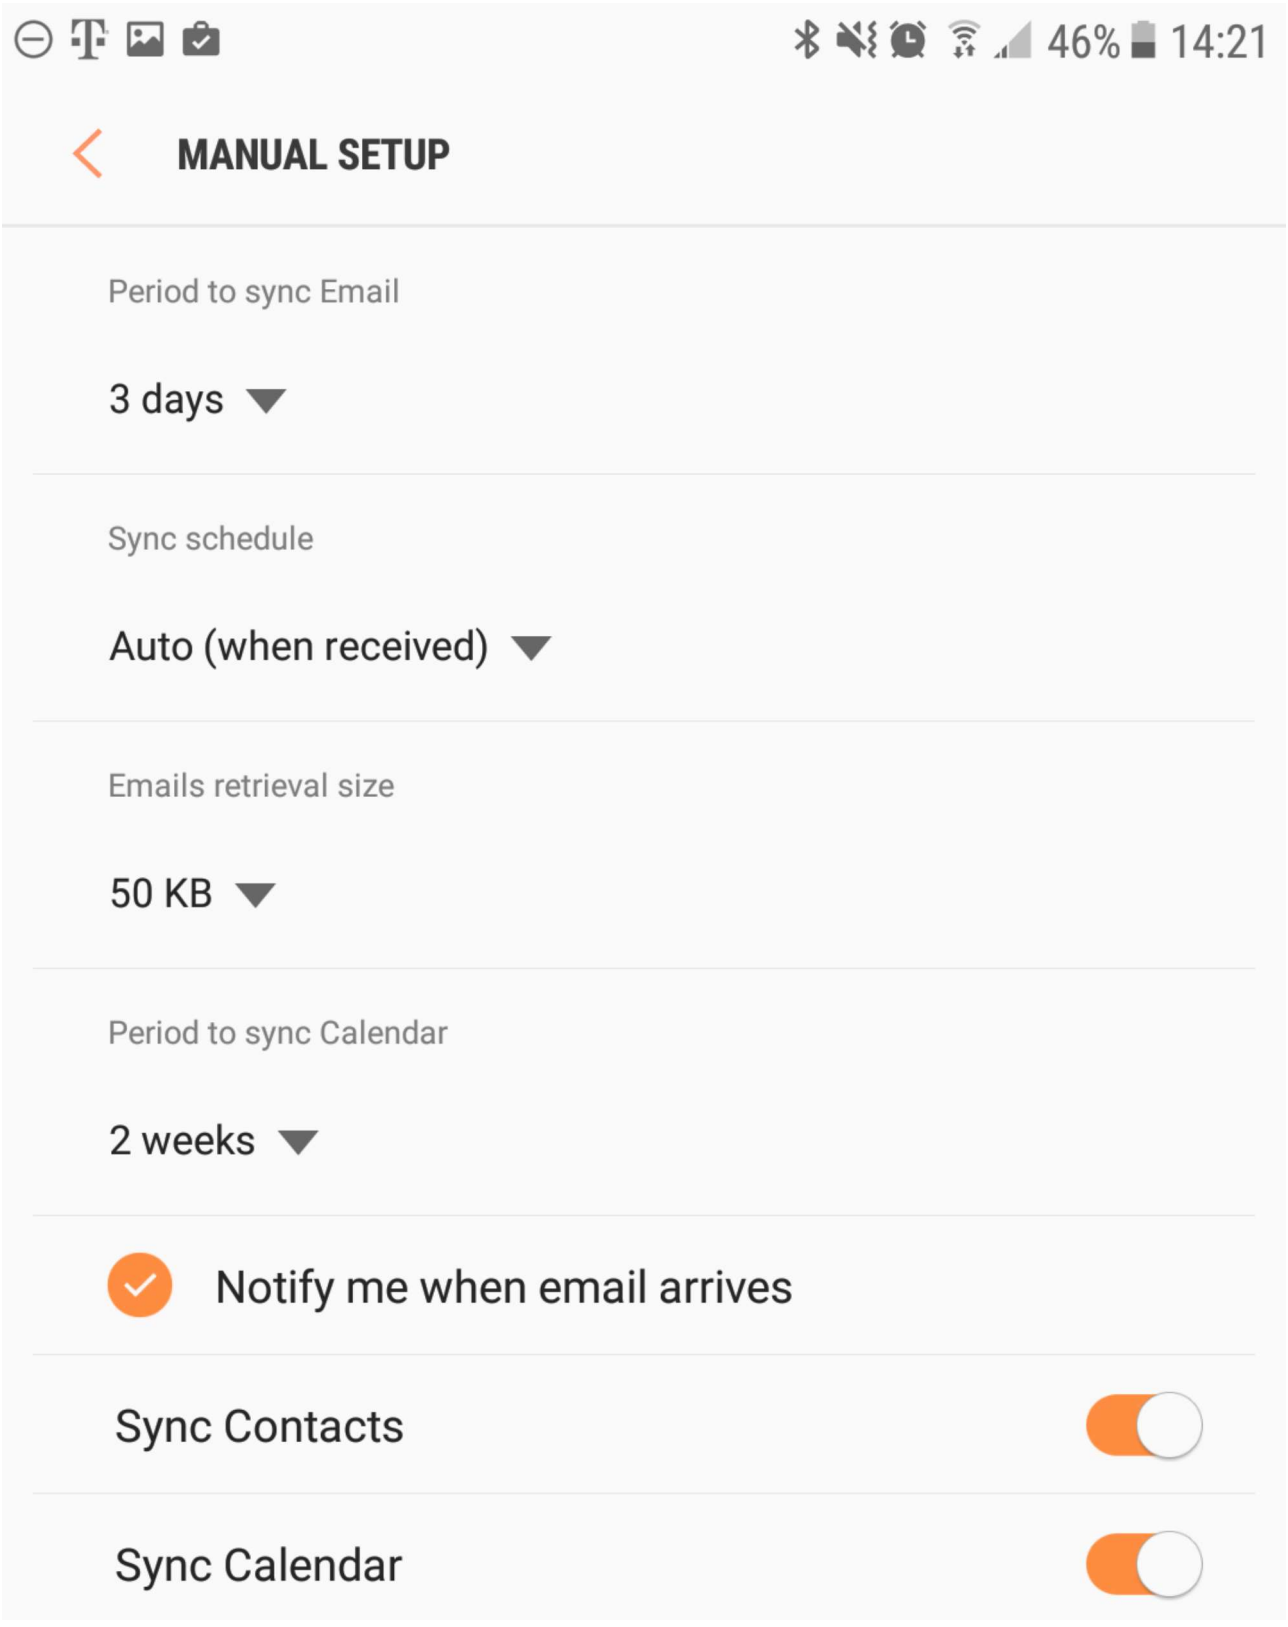
Server mex09.emailsrvr.com must be able to remotely control some security features on your device.

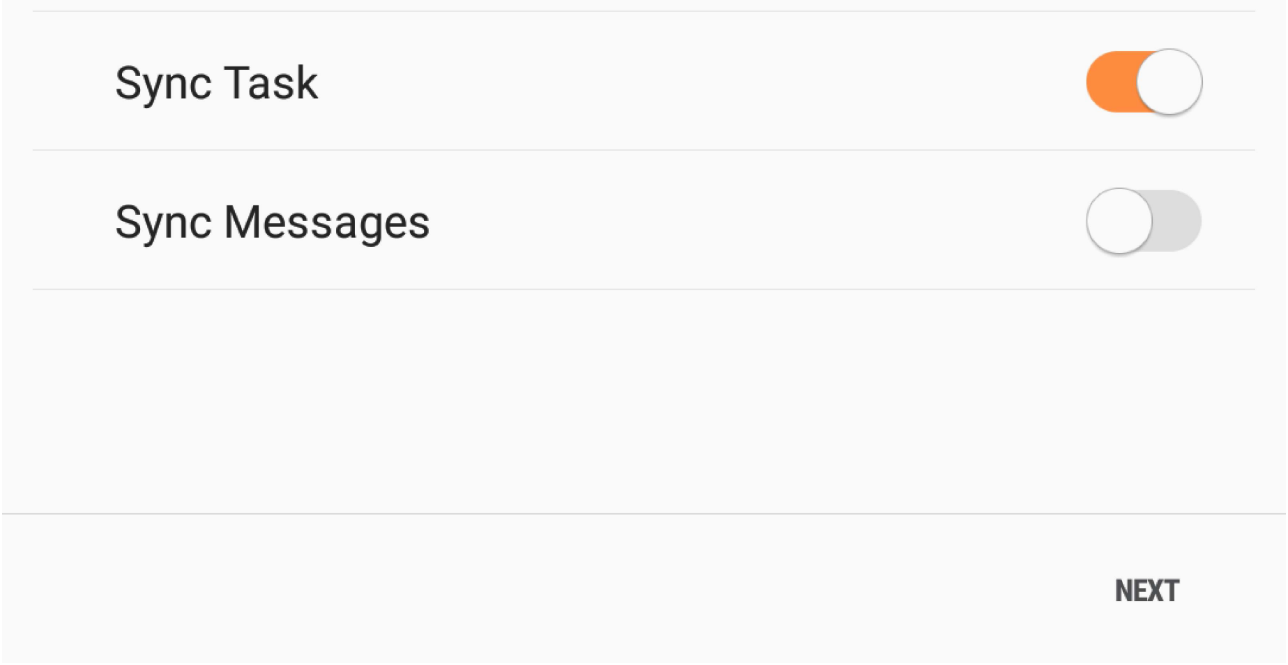
Activating administrator will allow Email to perform the following operations:

- **Erase all data**
  Erase phone's data without warning, by performing factory data reset.
- **Set password rules**
  Control the screen unlock password length and character restrictions
- **Monitor screen unlock attempts**
  Monitor number of incorrect passwords entered when unlocking screen, and lock phone or erase all phone data if too many incorrect passwords are entered.
- **Lock the screen**
  Control how and when the screen locks
- **Set screen unlock password expiration**
  Control how frequently the screen unlock password must be changed.
- **Set storage encryption**
  Require stored application data to be encrypted.
- **Turn off cameras**
  Prevent use of all device cameras.
- **Turn off functions on lock screen**
  Prevent the use of some functions while on the lock screen.
- **Set SD card encryption**
  Require application on SD card to be encrypted
- **Password recovery**
  Allow password needed to unlock device to be recovered



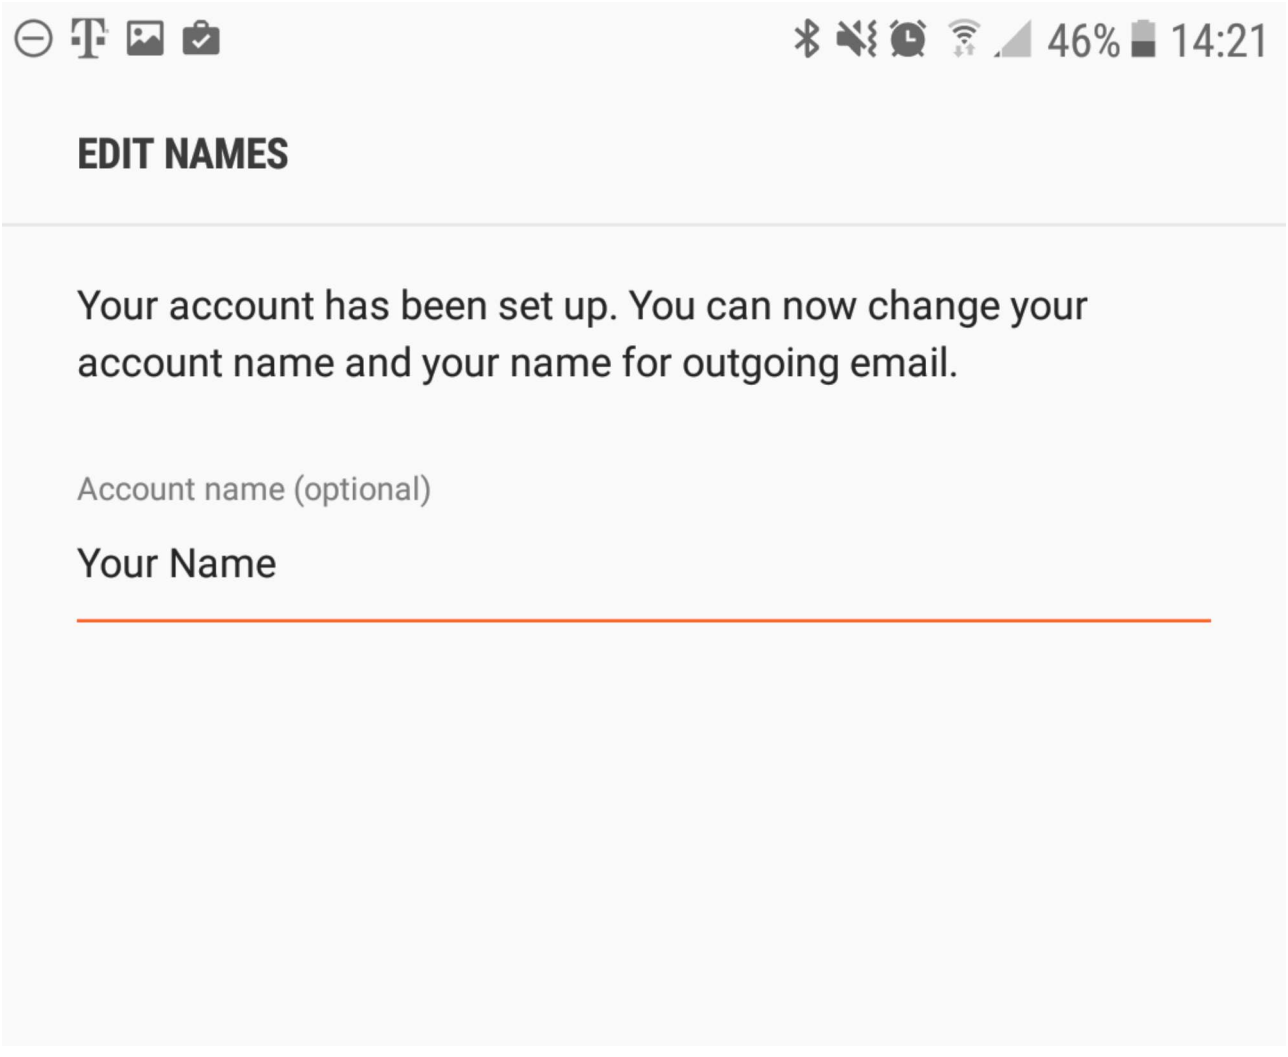
10. Modify the settings as desired.





11. Tap **Next**

12. **Account Name:** Name shown on outgoing emails



13. **You are all set!** Go back to the main menu, open the Email app and your messages should start syncing. Please give it a few minutes to download data before troubleshooting.
